

Developing Rich Internet Client Applications using Adobe® Flex 3™

**Monday, February 22 –
Tuesday, February 23**

9:00am - 4:30pm

In this two day, hands-on workshop you will learn all the primary features of Adobe® Flex 3™ they will need to know in order to build a fully functional, well architected front end for a Rich Internet Application (RIA). Rich Internet Application provide end users with more functionality and usability features than traditional websites. Examples include fully interactive photoimaging tools, customized graphical layout applications, order processing and job progress monitoring. FLEX is an environment well suited to fast turnaround of these RIAs. Sample applications will be explained and tested during this course.

Topics covered

- *What is an RIA*
- *Introduction to the FLEX API*
- *Using the FLEX Builder IDE*
- *Laying out the interface: A first step*
- *Adding Controls: Buttons, Menus and More*
- *Responding to user interaction: Handling Events*
- *Using the debugger*
- *Receiving & sending data to the server: XML*
- *Creating a custom component: building on the base*
- *Using the Tab Navigator: Views and States*
- *Validating user input*
- *Interfacing with the browser (history and JavaScript)*

Course Prerequisites

- *Familiarity with a scripting language such as JavaScript*
- *Experience building HTML websites*
- *Exposure to programming terminology*

Workshop Leader

Jeff Schuenke has been involved in web, interactive media and RIA development for over 13 years. He has developed numerous interactive applications ranging from corporate website to enterprise class

applications. In 1995, he formed Mirage Media to meet the needs of the growing rich internet application development

Registration Form

Monday, February 22 - Tuesday, February 23

\$495 for both days!

**Hands On
Workshop**

Wisconsin Department of Commerce Grant is subsidizing tuition.
