LABORATORY GROWN DIAMOND REPORT

PROPORTIONS

GRADING SCALES

Table with 5 columns for Color Grading Scale (CL to LT) and Clarity (10x) Grading Scale (FL to I). Color scale includes Colorless D-F, Near Colorless G-J, Faint K-M, Very Light N-R, and Light S-Z. Clarity scale includes Flawless Internally Flawless, Very Very Slightly Included, Very Slightly Included, Slightly Included, and Included.

The laboratory grown diamond described in this Report (Report) has been graded, tested, analyzed, examined and/or inscribed by International Gemological Institute (IGI). A laboratory grown diamond is one that has essentially the same chemical, physical and optical properties as a mined diamond, with the exception of being grown by man (a manufactured product). IGI employs and utilizes those techniques and equipment currently available to IGI, including, without limitation, 10X magnification, corrected triplet loupe, binocular microscope, master color comparison stones, non-contact-optical measuring device, Diamond Sure™, Diamond View™, Spectrophotometer and such other instruments and/or processes as deemed appropriate by IGI. This Report includes advanced security features. A duly accredited gemologist or jeweler can advise you with respect to the importance of and interrelationship between cut, color, clarity and carat weight.
